**Methodology**

The census was primarily conducted by mail inquiry. Respondents were required to complete and return the questionnaires to the Department. Field enumeration was undertaken for the establishments that did not respond.

**Reporting unit**

The census / survey was conducted on an **establishment** basis. An establishment is defined as '**an economic unit that is engaged in one activity, under a single legal entity and operation in a single legal entity and operating in a single physical location**'. Each establishment is assigned an industry classification based on its principal activity and not that of its parent company. An establishment operating in more than one location was required to file a separate report for each store, factory or shop. Thus, conceptually, for a multi-activity entity, units engaged in separate activities in the same location constituted distinct establishments. Similarly, each branch of a multi-branch entity at a different location was conceptually a different establishment.

However, if in practice, the accounts were centrally kept such that it was not possible to obtain separate data for each individual unit or branch, that entity was treated as a single reporting unit and allowed to submit a consolidated return covering all the units or branches.

**Type of business activity**

The type of business activity refers to both principal and secondary activities. The principal activity refers to the activity to which the establishment devoted most of its resources or activity which contributes the largest income. Secondary activities are those incidental or ancillary to the principal activity. The classification of the industry of the establishment is based on the principal activity and is in accordance to the Malaysia Standard Industrial Classification (MSIC) 2008 Ver. 1.0.

*The MSIC 2008 Ver. 1.0 conforms to the International Standard Industrial Classification of All Economic Activities (ISIC), Revision 4, United Nations, with modifications to suit local conditions.*

### **Legal organisation**

*The legal organisation of an establishment is defined as follows:*

#### **(i) Individual proprietorship**

*This refers to a business, owned and operated by one person for profit. The owner has the exclusive right to control the operations of the establishment.*

#### **(ii) Partnership**

*This refers to a group of individuals who agree to contract and to carry on a business with the objective of making a profit. The business is managed by all or any one acting for all parties. A trading partnership must comprise at least two members and should not exceed a maximum of twenty members.*

#### **(iii) Private limited company**

*This is a private corporation established to undertake a business with the objective of making a profit. The shares are closely held by shareholders of the corporation who have control over its operation. It is registered with limited liability. A private limited company has a Memorandum and Articles of Association, which among others:*

- a) restricts the right to transfer its shares;*
- b) limits the number of its shareholders between two to fifty (not including employees of the company and past employees who are currently members);*
