1. Pendahuluan Laporan ini memuatkan data sektor Bekalan elektrik, gas, wap dan pendinginan udara bagi tahun 2010. Data tersebut pertama kali dikumpul dan disusun daripada Banci Ekonomi yang dilaksanakan pada tahun 2011.

2. Objektif Objektif utama banci ini adalah untuk mengumpul maklumat tentang pertumbuhan, sumbangan, komposisi dan taburan sektor Bekalan elektrik, gas, wap dan pendinginan udara bagi membantu kerajaan dalam perancangan pembangunan dan penggubalan dasar. Data yang diperoleh dari banci juga memberi maklumat penanda aras dan digunakan dalam penyusunan akaun negara, jadual input-output serta kajian tertentu. Maklumat tersebut juga digunakan oleh sektor swasta dan individu bagi tujuan analisis ekonomi.

3. Kuasa perundangan Banci ini dilaksanakan di bawah peruntukan **Akta Perangkaan 1965 (Disemak 1989)**. Seksyen 5 di bawah Akta ini menghendaki mana-mana pertubuhan yang beroperasi di Malaysia untuk memberikan maklumat sebenar atau anggaran terbaik kepada Jabatan. Mengikut Akta ini, kandungan soal selidik yang diterima adalah **sulit** dan hanya angka agregat diterbitkan.

4. Skop dan liputan Banci ini meliputi pertubuhan berdaftar yang terlibat dalam aktiviti bekalan elektrik, gas, wap dan pendinginan udara sebagai aktiviti utamanya. Sumber maklumat utama rangka pertubuhan diperoleh daripada Suruhanjaya Syarikat Malaysia (SSM).

Selain daripada SSM, maklumat rangka banci juga dikumpulkan daripada sumber-sumber lain seperti Kementerian Tenaga, Teknologi Hijau dan Air, Suruhanjaya Tenaga, Tenaga Nasional Berhad, *Sabah Electricity Sendirian Berhad* dan *Sarawak Electricity Supply Corporation*. Rangka dikemas kini untuk mengambil kira pertubuhan baru dan sebarang perubahan yang berlaku kepada pertubuhan seperti tutup, tidak beroperasi, perubahan jenis aktiviti, lokasi kilang atau alamat pos.

Liputan banci terdiri daripada 8 industri di peringkat 5-digit bersamaan dengan 3 kumpulan di peringkat 3-digit yang dikelaskan mengikut Piawaian Klasifikasi Industri Malaysia (MSIC), 2008 Ver. 1.0.

Senarai lapan industri tersebut adalah :

Bagi pertubuhan yang menjalankan pelbagai aktiviti, unit yang bergiat dalam aktiviti yang berasingan dalam satu lokasi yang sama terdiri daripada entiti pertubuhan yang berbeza. Oleh itu, setiap cawangan daripada organisasi yang mempunyai pelbagai cawangan di lokasi yang berbeza dari segi konsep dianggap sebagai pertubuhan yang berlainan. Pertubuhan berkenaan diminta memberikan pernyata yang berasingan bagi setiap kegiatannya dari segi nilai. Walau bagaimanapun, dari segi praktisnya akaun biasanya disediakan secara berpusat kerana kesukaran untuk memperoleh data yang berasingan bagi setiap unit atau cawangan Entiti atau enterpis ini akan dianggap sebagai satu unit pelapor dan dibenarkan mengemukakan soal selidik yang menggabungkan semua unit atau cawangannya.

- 1. Introduction** This report provides information on Electricity, gas, steam and air conditioning supply sector for reference year 2010. The data were first collected and compiled under the Economic Census conducted in 2011.
- 2. Objective** The main objective of the census is to collect information pertaining to growth, contribution, composition and distribution of the Electricity, gas, steam and air conditioning supply sector to assist the government in development planning and formulating policies. Data obtained from the census also provides benchmark information and are used for the compilation of national accounts, input-output tables as well as specific studies. The results are also used by private sectors and individuals for economic analysis.
- 3. Legal authority** The census was conducted under the provisions of the **Statistics Act, 1965 (Revised - 1989)**. Section 5 of this Act requires all establishments operating in Malaysia to provide actual information or best estimates to the Department. The Act stipulates that the contents of the individual returns are **confidential** and only aggregated figures are published.
- 4. Scope and coverage** The census covered all registered establishments engaged in electricity, gas, steam and air conditioning supply sector as main activities. The main source of information for the frame is the Companies Commission of Malaysia (CCM).

Apart from the CCM, information on the electricity, gas, steam and air conditioning supply frame was also gathered from other sources such as the Ministry of Energy, Green Technology and Water, Energy Commission, Tenaga Nasional Berhad, Sabah Electricity Sendirian Berhad and Sarawak Electricity Supply Corporation. The frame is updated to take into account new establishments and to record any changes in the status of the establishments such as closed down, not in operation, change in activities and location or postal addresses.

The coverage of the census included 8 industries at 5-digit level corresponding to 3 groups at 3-digit level classified under Section D in the Malaysia Standard Industrial Classification (MSIC), 2008 Ver. 1.0.

The eight industries are listed below :

- i. *Industry 35101 : Operation of generation facilities that produce electric energy*
- ii. *Industry 35102 : Operation of transmission, distribution and sales of electricity*
- iii. *Industry 35201 : Manufacture of gaseous fuels with a specified calorific value, by purification, blending and other processes from gases of various types including natural gas*
- iv. *Industry 35202 : Transportation, distribution and supply of gaseous fuels of all kinds through a system of mains*
- v. *Industry 35203 : Sale of gas to the user through mains*
- vi. *Industry 35301 : Production, collection and distribution of steam and hot water for heating, power and other purposes*
- vii. *Industry 35302 : Production and distribution of cooled air, chilled water for cooling purposes*
- viii. *Industry 35303 : Production of ice, including ice for food and non-food (e.g. cooling) purposes*

However, there were three industries (35201, 35203 and 35301) which could not be classified as principal activities either due to no establishments representing these industries or these activities were reported as secondary activities.

- 5. Methodology and response** *The census was conducted through mail enquiry. Respondents were given one month to complete and return the questionnaires to the Department. After that period, field enumeration was undertaken to expedite response from the remaining establishments.*

- 6. Reporting unit** The reporting unit used in the census was the **establishment**. An establishment is defined as “an economic unit engaged in one activity, under a single legal entity and operating in a single physical location”. Each establishment was assigned an industry classification based on its principal activity. In the case of a multi-activity entity, units engaged in separate activities in the same location constituted distinct establishments. Thus, each branch of a multi-branch organization at a different location was conceptually treated as a different establishment. The establishment was requested to give separate returns for each activity in terms of value. However, if in practice, the accounts were centrally kept such that it was not possible to obtain separate data for each individual unit or branch, the entity or enterprise was treated as a single reporting unit and allowed to submit a consolidated questionnaire covering all the units or branches.
- 7. Census year** Census year refers to the year in which a census was conducted.
- 8. Reference period** The reference period of the census was the calendar year 2010. Establishments whose accounting year differed from the calendar year were requested to report according to the accounting or financial year covering the major part of the reference period.
- 9. Type of activity** The type of business activity refers to both principal and secondary activities. The principal activity refers to the activity to which the establishment devoted most of its resources or to which it derived most of its income. Secondary activities are defined as those incidental or ancillary to the principal activity. The classification of the industry of the establishment is based on its principal activity and is in accordance with the Malaysia Standard Industrial Classification (MSIC), 2008 Ver. 1.0. The MSIC 2008 conforms to the International Standard Industrial Classification of All Economic Activities (ISIC) Rev. 4, United Nations.
- 10. Concepts and definitions** Concepts and definitions used are based on the recommendations of the United Nations Statistics Division¹. These concepts adhere to accepted practices, thereby facilitating international comparability of data.
- 10.1 Definition of electricity, gas, steam and air conditioning supply**
The definition of electricity, gas, steam and air conditioning supply used in this census follows the Malaysia Standard Industrial Classification (MSIC) 2008 Ver. 1.0.

¹ International Recommendations for Industrial Statistics, United Nations Statistics Division, Statistical Papers, Series M No.90, Rev. 3, United Nations, New York, 2009.

"Electricity, gas, steam and air conditioning supply is defined as the activity of providing electric power, natural gas, steam, hot water and the like through a permanent infrastructure (network) of lines, mains and pipes. The dimension of the network is not decisive; also included are the distribution of electricity, gas, steam, hot water and the like in industrial parks or residential buildings. This section therefore includes the operation of electric and gas utilities, which generate, control and distribute electric power or gas. Also included is the provision of steam and air-conditioning supply."

10.2 **Legal organisation**

For the purpose of this census, the legal status of an establishment has been defined as follows :

- (a) *restricts the right to transfer its shares;*
- (b) *limits the number of its shareholders between two and fifty (not including employees of the company and ex-employees who are currently members);*

- (c) prohibits any invitation to the public to subscribe for any share or debenture of the company; and
 - (d) prohibits any invitation to the public to deposit money with the company for fixed periods or payable at call with or without interest.
- iv. **Public limited company** : A public limited company is also a private corporation established, with limited liability, by a minimum of two persons to operate the business with the objective of making profit. The shares in a public limited company are openly held, and in the case of a company listed on the stock exchange, the shares are freely transferable. The company is regarded as a legal entity and is constituted by the Memorandum and Articles of Association.
- v. **Co-operative** : This refers to a voluntary association with an unrestricted number of members and registered under the Co-operative Act 1993. Funds are collectively owned to meet the needs of members.
- vi. **Public corporation** : This refers to an undertaking set up under the Special Act of Parliament or by the State Legislature.

Such workers generally receive food, shelter and other support as part of the household of the owner but these provisions would continue whether they work or not in the establishment.
